Every engine looks at the same board. The brightest square is the move it believes in. On 3 November, we find out whose belief holds up.

Hello everyone,

Chess has always been the board where machines learn to think. For the first time on campus,**AI Club** is putting that idea on stage, and **cash prizes will be awarded to winners**.

Here is how it works: **we give you the resources** (attached to this mail) to build a chess engine. You build it, on your own, as a solo participant. On 3 **November**, you showcase it live, and it fights.

Other agents first. Then, for the finalists, the people who live for this game.

1

Get the resources

We have attached two guides: the competition guidelines, and a step-by-step guide to building a chess agent.

2

Build your engine

Use the kit to build your own engine, individually, before the event. Neural net, search, heuristics: your method, your call.

3

Showcase on 3 November

Your engine plays on Lichess as a bot. Round 1 is a knockout, agent vs agent at 3 minutes + 2 seconds, with no human help. The last three agents standing are the winners.

4

Face the Chess Club

The three winners play Chess Club members at 10 minutes + 5 seconds, using the same bot accounts.

Your engine	Chess Club

Even at the start. Everything after that is decided on the board.

THE REWARD

Cash prizes will be awarded to winners.

♞ **Solo participation only. No group participation.**

Date	Time	Venue
3 November	**9:00 pm**	**CEP-110**

Solo participation only. No group participation. Every participant builds their own engine individually. Submit your engine by **2 November 12:00 pm**.

ATTACHED TO THIS MAIL

PDF

Competition Guidelines for Competitors

The rules: what you may and may not use, UCI and Lichess bot setup, submission format, knockout and final stage.

PDF

How to Build a Chess Agent

Six ways to build your engine, from random moves and minimax to alpha-beta search and neural networks.

Read the guidelines first. One rule matters most: your engine's chess intelligence must be your own work, with no existing engine like Stockfish. Don't code? Come and watch the showcase.

Submit your registration

One response per participant.

Don't code? Come and watch the showcase. The best games will be on the big screen.

It’s the first time our two clubs have joined forces, and we intend to make it one nobody forgets. Bring your best model. The board is set.

Your move,

AI Club × Chess Club
